

Description

The 406B *Super Wash™ Electronics Cleaner* is a very fast drying and zero residue cleaner degreaser for PC boards. This hydrocarbon-based cleaner is perfect for quick PC boards cleaning. When used as a secondary rinse, it accelerates the drying time of boards treated with slower drying cleaners. Great for dissolving many types of flux. Cleans and degreases printed circuit boards, machinery, electrical and electronic devices.

Features and Benefits

- **Suitable for Use in Food Facilities as a Non-Food Chemical**—Canadian and NFS recognition letters available on request
- **Safe on many plastics**
- **Zero residue**
- **Fast evaporation rate**
- **Dissolves oils and residues**
- **A variable valve on the aerosol lets you adjust the flow rate as needed**
- **RoHS compliant**

ATTENTION!

Do NOT use on live circuits.

For use on equipment that will not tolerate aqueous cleaning solutions. Not for use in direct contact with food.

Compatibility

Substrate Compatibility: Consult 406B partial compatibility chart table for substrate compatibility. It is always recommended to perform a compatibility test on a non-critical test area prior to large scale applications. Perform this test even if the chart predicts high compatibility since modern plastic parts may incorporated hidden incompatible materials in the form of plastic blends or as protective and decorative coatings.

Compatibility Chart

<i>Plastic type</i>	<i>Resistance</i>
Epoxy	Very Good
ABS (acrylonitrile butadiene styrene)	Poor
PMMA (Acrylic)	Good
PVC (Polyvinyl chloride)	Good
HD-PE (high density polyethylene)	Good
LD-PE (low density polyethylene)	Partial
PP (polypropylene)	Good
PS (polystyrene)	Partial
PC (Polycarbonate)	Poor

ATTENTION!

Use with care on thin plastics or near parts that are chemically sensitive.

Solvent Miscibility: The 406B is generally miscible organic solvent, but it is immiscible with water.

Health, Safety, and Environmental Awareness

Please see the 406B **Safety Data Sheet** (SDS) for more details on transportation, storage, handling and other security guidelines.

Health and Safety: This liquid is highly flammable and should be kept away from flames and other ignition sources. Avoid breathing in fumes or direct contact with the material.
